Subject - Gasoline odors in basement

On April 21, 1984 I received a call from Wayne Latimer, Supervisor of Sewer Maintenance, in reference to a complaint he had received from the resident of 1730 S. Fort.

I contacted Mrs. Young at 4:00 P.M. that afternoon and collected a sample of the seepage in her basement. At the time of sample collection a faint odor of gasoline was noticed in the basement. Additionally the seepage exhibited a slight rainbow.

On April 23, 1984 I collected a water sample from the interceptor trench at Peck's 66, Sunshine and Fort.

Both samples were taken to the S.W. Treatment Plant laboratory for analysis.

RE: Gasoline Odor - 1730 South Fort; Ms. Young

Bob, as per your request, a gasoline test was made at this address by Fire Marshal Dan Thurman on February 22, 1985, 1450 hrs.

The floor was tested with total negative results. The wall was tested with a slight reading of petroleum vapors of less than 3 percent on flammability range.

Re: Mrs. Ginger Young, 1730 S. Fort Ave. - Gasoline Odor in Basement

At approximately 12:15 P.M. (7-3-84) I received a call from Mrs. Ginger Young stating that she had a strong odor of gasoline in her basement. Mrs. Young stated that she did not have any problem with water coming in her basement, but that she thought the gasoline was in the soil outside the basement wall. Mrs. Young was trying to find someone to take a soil sample and check it for the presence of gasoline. After talking to Mr. Robert Schaefer, Supt. of Sanitary Services, I contacted Mrs. Young at 4:00 P.M. to inform her that she would need to have a private lab take a soil sample and analyze it.

Re: Gasoline Odors at 1730 S. Fort

I talked to Mrs. Young over the phone on June 20, 1984. She indicated that gasoline odors were still present in the basement and on her patio, especially when it rains. I told her I would contact DNR and refer her problem to them. She also indicated that the sample I took from her basement on April 21, 1984, according to the lab, could not be identified.

Dear Mr. Corson:

Thank you very much for the materials that you sent me in regard to the gasoline problems in the area of Fort and University, and specifically at 1730 S. Fort involving our clients, the Youngs.

A review of your material raises two additional questions:

(1) Do you know what action, if any, Taylor Petroleum 1201 W. Sunshine has taken in checking its fuel lines and tanks?
And the results of that check?

(2) Who is the "Gene" on the memo of 1-9-84, and referred to in other reports?

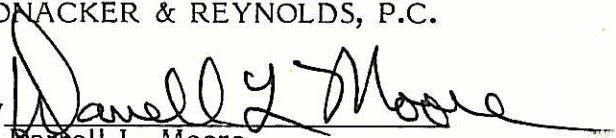

I would appreciate your response to those two questions. Additionally, we would gladly reimburse the city for the expense of copying and mailing the 27 copies of material that you sent me. Please send us an invoice or bill so that we can reimburse the city for the cost of those 27 copies.

Again, I appreciate your assistance in this matter.

Sincerely,

BONACKER & REYNOLDS, P.C.
